Audit Presentations and Oral Defense

Quantum Cognition for Human-AI Decision Teaming

Nathan Yang

M4S1

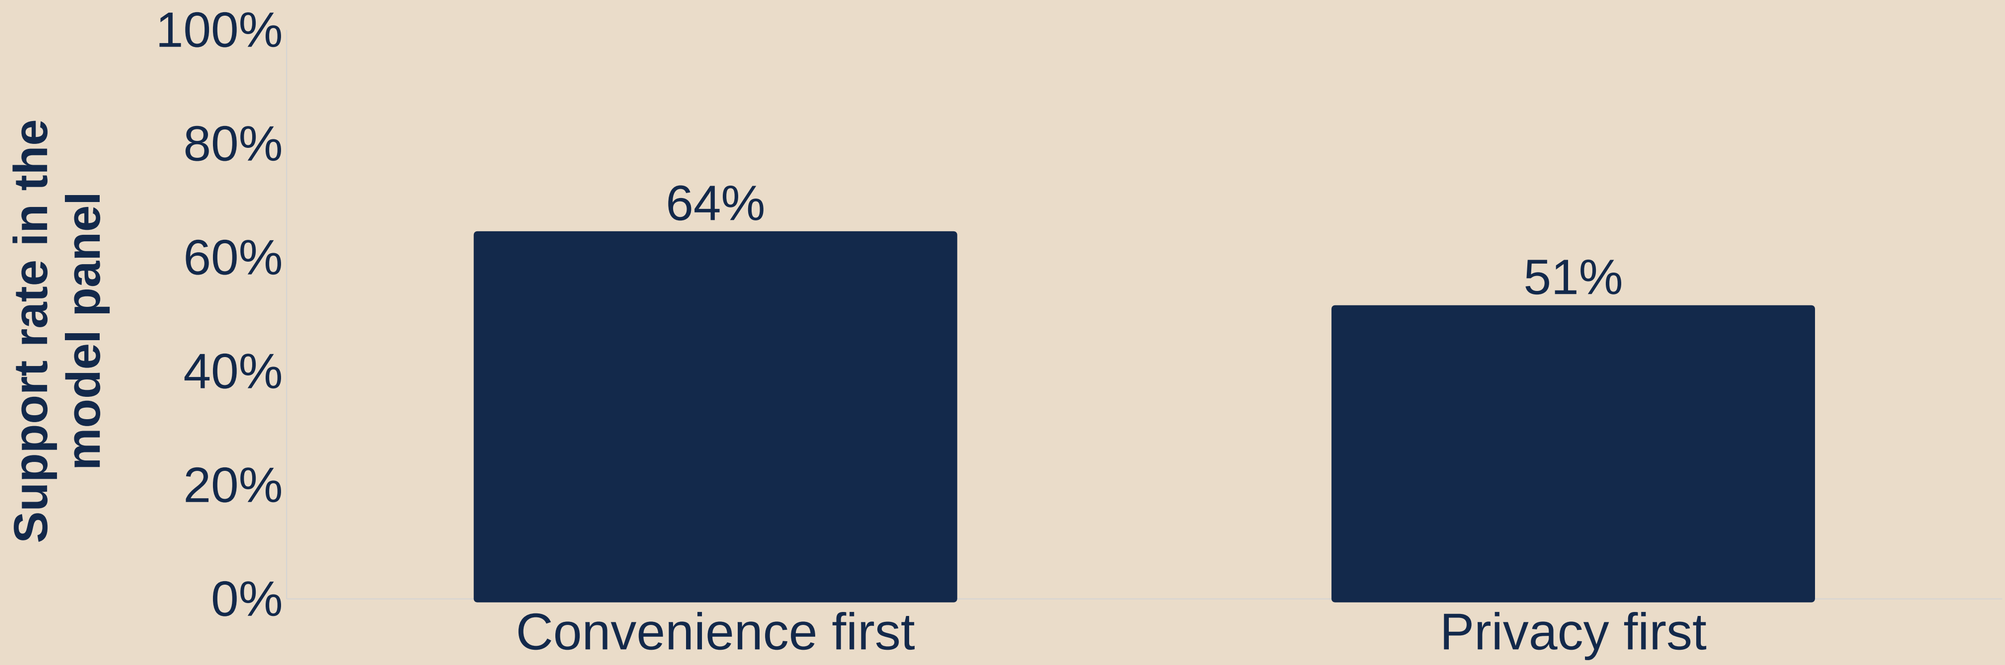

Presentation Block

Ten-minute individual presentation.

Five minutes of questions.

Up to six presenters in a 90-minute block.

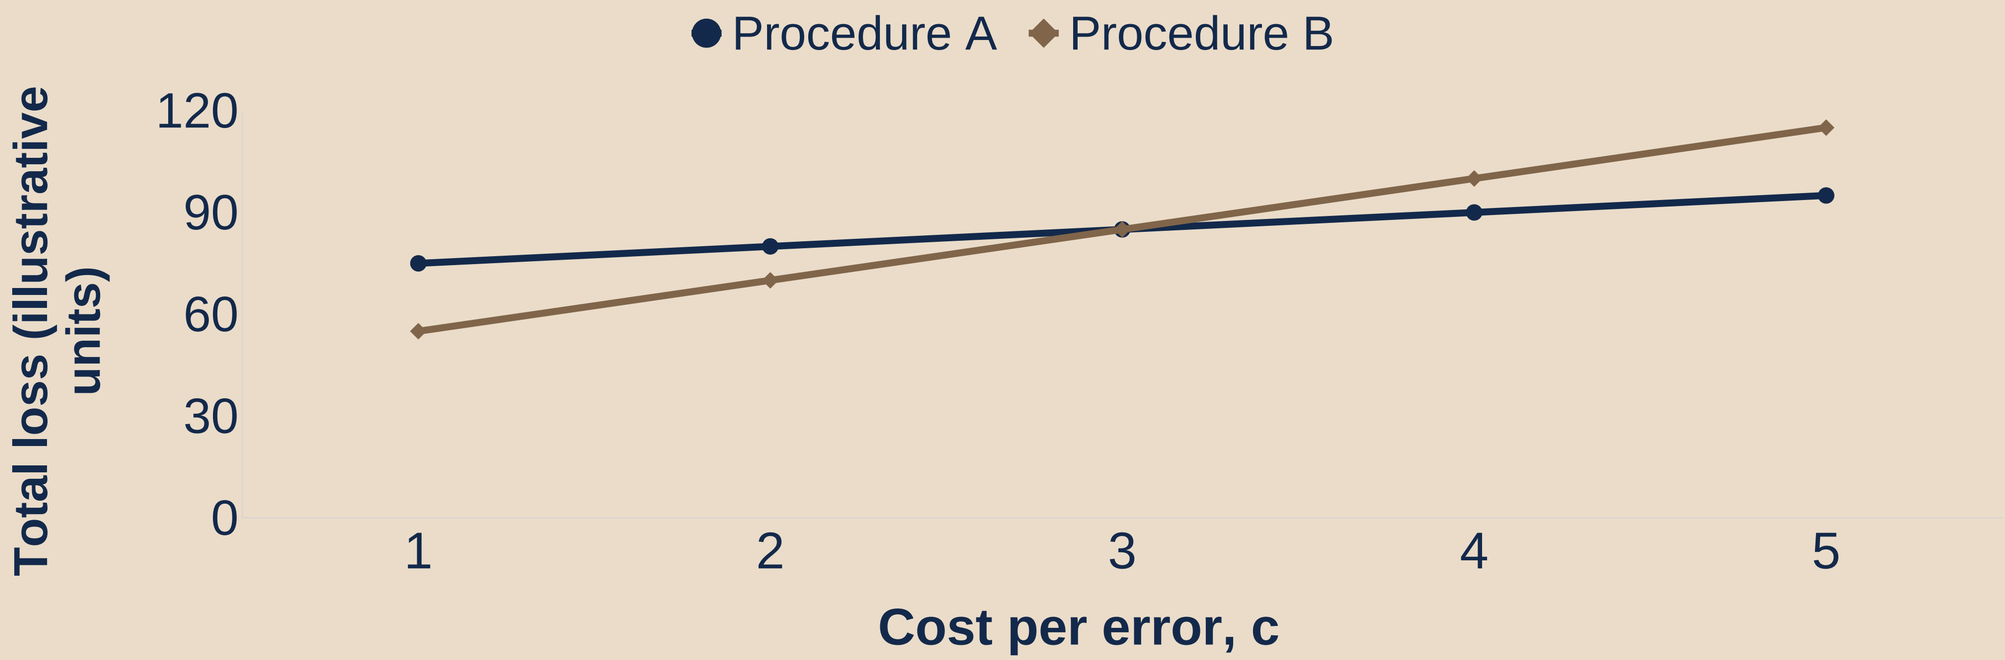

A Figure for the Client Decision

Illustrative audit: 128/200 versus 102/200 valid responses.

What evidence belongs next to these rates?

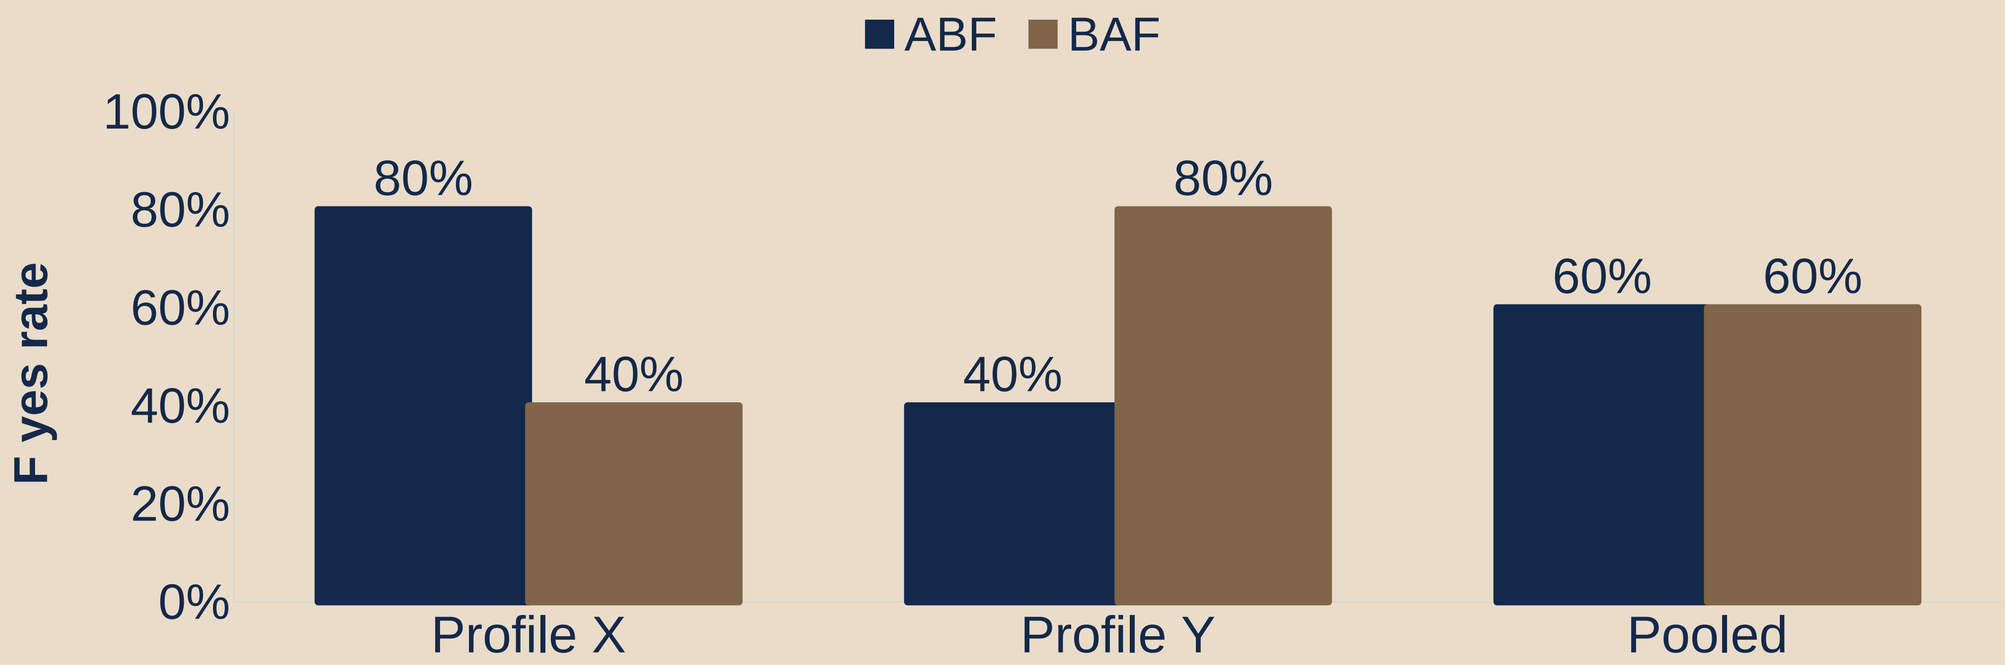

A Recommendation Depends on Costs

Imposed loss: A = 70 + 5c; B = 40 + 15c.

At what error cost would your recommendation change?

Averages and Subgroup Patterns

Imposed rates: 100 observations per profile in each order.

Which comparison deserves a question from the reviewer?

After the Presentation

Record the feedback that affects your recommendation.

Revise the report and document the change.

Retain the evidence supporting your final judgment.
